

SUMMARY:

Full-Stack Developer with 9+ years of experience delivering production-ready applications for international clients. Specialized in .NET and Angular across the full stack – from API design and backend architecture to responsive frontend development. Experienced with cloud deployments on AWS and Azure, and currently building personal SaaS projects. Focused on fast, quality delivery using AI-assisted development workflows.

PROFESSIONAL EXPERIENCE

Devlights Full-Stack Developer
Working with international clients
2017 - 2026

PROJECTS:

SITA (Canada-based client):

Desktop application for flight-tracking and aircraft management.

Role: Desktop Developer

Duration: 2022 – 2023 – 2024

- Migrated and modernized a legacy WinForms desktop application
- Improved UI/UX using advanced components (Infragistics: grids, trees, menus)
- Implemented MVVM pattern to improve separation of concerns
- Built data-driven UI with data binding and event handling
- Worked with large datasets (sorting, filtering, exporting)

Tech: .NET Framework, WinForms, C#, WCF, SQL Server

Proactive Management (US-based client):

Role: Full Stack Developer

Duration: 2018 – 2019 – 2022

- Developed web applications for gyms, healthcare, and insurance platforms
- Built systems for patient document signing and medical workflows
- Implemented solutions for surveys in ambulatory surgery centers
- Worked across multiple business domains with real-world users

Tech: .NET Core / ASP.NET Core, Angular (v8–12), AngularJS, SQL Server

HST pathways (US-based client):

Role: Full Stack Developer

Duration: 2021

- Developed webhook-based systems for payments and insurance integrations
- Built web tools to customize internal services and workflows

Tech: .NET / ASP.NET Core, Angular (v8–10), AngularJS

Simple Admit (US-based client):

Role: Full Stack Developer

Duration: 2019 – 2021

- Maintained and improved a healthcare management platform used by multiple facilities.
- Reduced manual processes through backend automation.
- Developed internal microservices for task processing.
- Integrated internal and external web services.
- Built frontend components for internal applications.
- Worked with healthcare integrations and HL7 message processing for clinical and administrative data exchange.
- Participated in processing HL7 messages that were parsed and processed by backend services before being stored in SQL Server.

Tech: .NET Core 3.1 / ASP.NET Core, AngularJS, SQL Server

Internal Devlights Projects

Role: Fullstack Developer

Duration: 2017 – 2026

- Served as the sole developer on multiple internal projects, owning the full technical scope in architecture decisions.
 - Defined stack and architecture for each project, selecting technologies based on business requirements.
 - Participated in regular client-facing meetings (weekly cadence), translating business needs into technical solutions.
 - Coordinated directly with the designer and PM throughout the development lifecycle.
 - Conducted code reviews and enforced coding standards and best practices.
 - Developed internal tools for client and user management.
 - Contributed to the company website and internal platforms.
 - Built a single-page simulation landing with REST API integration.
- Backend: .NET / ASP.NET Core
 - Frontend: Angular (v13-15, v18, v20)
 - Database: SQL Server, PostgreSQL

PERSONAL PROJECTS

MateApp (in development).

Full-stack application for business management (inventory, sales, scheduling).

Duration: 2026– Present

- Built with Angular (v20) + .NET 10 + PostgreSQL
- Deployed on AWS (S3 + CloudFront + Elastic Beanstalk + RDS)
- Includes real-time operations, dashboard analytics, and business workflows
- Focused on scalability and real-world usage

PedidoSimple (in development).

Web platform for managing orders and clients for a local business.

Duration: 2026– Present

- Public landing + admin dashboard
- Angular (v20) + .NET 10 + PostgreSQL
- Deployed on AWS (S3 + CloudFront + Elastic Beanstalk + RDS)
- Focus on usability and business process automation

LocalConnect (in development).

Social/local connection platform (in development).

Duration: 2026– Present

- Angular (v20) + .NET 10 + SQLServer
- Includes media upload (images/videos) and scalable backend design
- Deployed on Azure (Storage Account, App Service, Azure SQL Database)
- Exploring mobile and cloud-based architecture

LANGUAGES

- Spanish: Native
- English: Intermediate (B1-B2)

SKILLS

- Frontend: Angular (v8–20), AngularJS, TypeScript, JavaScript, HTML, CSS, SCSS, Bootstrap.
- Backend: .NET Framework, .NET Core, .NET 5/6/8/10, ASP.NET Core, Entity Framework, RESTful APIs, SignalR.
- Database: SQL Server, PostgreSQL.
- Cloud & DevOps: AWS, Microsoft Azure, Azure DevOps, CI/CD Pipelines, IIS.
- Version Control: Git, Bitbucket, TFS.
- Architecture & Practices: Clean Architecture, SOLID Principles, MVC, MVVM, Repository Pattern, Unit of Work, CQRS, MediatR, Agile Scrum.
- Development Tools: AI-assisted development (ChatGPT, Codex, Claude, Claude Code).

EDUCATION

- Bachelor of Information Systems - Universidad Nacional del Nordeste, Corrientes, Argentina.
- Courses / Certificates:

CRUD with Angular 18 & .NET 8: Create project Backend & DB.

Build Chat app with ASPNETCore and Angular from scratch.

Angular Progressive Web Apps (PWA) MasterClass, UDEMY.
